EVOLUTION JET INTERNATIONAL

Evolution Jet International was born in October 2010, when Marc Lile (owner of an airline company in Malta) and Aymeric Even (broker) decided to unite their skills to create a reliable company that combines all commercial and operational knowledge of the industry to meet the expectations of its very demanding clientele.

The Evolution Jet is equipped with the best and most powerful tools of the market. Its sales team has direct and live access to more than 3,000 aircraft worldwide. The volume allows Evolution Jet to offer the best price on the market and to set up a flight in less than 2 hours.

Beyond the traditional and classic service of brokerage, Evolution Jet is offering two new exclusive products:

EJI Premium Service: The private jet at actual cost, no commission.

The client will have access to all Evolution Jet's services for free. No extra cost, no commission, the client will pay the actual amount charged by the operator. Requires an annual membership fee, offers the choice of three different subscriptions according to the duration of the commitment.

EJI Deposit service:

EJI deposit is a dedicated account that can be fed at client's convenience and with any amount. Any deposit may be refunded at any time. Such account permits the customer to pay for all services such as private jets or yachts, ground transportation or any other luxury service.

By eliminating the usual fastidious and time-consuming payment process, where the customer must provide a credit card for a guarantee and make a wire transfer prior to the departure of each flight, EJI deposit service simply requires client's agreement for the disbursement of funds for a specified service with no unnecessary stress or time delays.
